FARSEEN AHRAS RAUFALI

Mogral Puthur, Kasaragod • +91 7012653215 • farseenahrasraufali@gmail.com

SUMMARY

Computer Science and Engineering student with hands-on experience in Python, Java, C++ and embedded systems. Led an ESP32-based drone flight controller project and IoT workshops, and is currently developing a hydroponic farming system using IoT devices. Collaborative problem-solver who learns new tools quickly.

PROJECT

Hydroponic Farming using IoT Devices **2026 - Now**

- Lead Developer — Mini project building a hydroponic farming system using IoT devices.
- Leading the team in building the IoT system and coordinating development.

Drone Flight Controller & Embedded Systems **2025 - 2026**

- Project Lead — ESP32 flight-control firmware with MPU6050 IMU, PWM ESCs, PPM receiver input and PID tuning.
- Debugged sensor orientation, drift and oscillation through iterative hardware and firmware testing.

IoT Workshops & Home Automation **2024 - 2025**

- Project Lead — Led ESP32/IoT workshops covering sensors, displays, buzzers and Wi-Fi projects; built a Home Assistant–based automation system using ESP32, DHT22, PIR/IR sensors, relays, RGB status lighting and OTA updates.

Head Volunteer, Workshop **2024 - 2025**

- RC Car workshop with IEEE
- Led the volunteer team that organised and ran the workshop.

EDUCATION

B.E. Computer Science and Engineering **2022 - 2028**
P A College of Engineering | CGPA: 8.81/10

High School - PCMC **2020 - 2022**
Dhakeerath EMHSS | Percentage: 90%

SKILLS

- Languages: Python, Java, C++, C, Lua, JavaScript, HTML/CSS, SQL
- Tools & Platforms: Git, GitHub, VS Code, Node.js, Arduino IDE, Linux
- Soft Skills: Teamwork, Problem Solving, Collaboration

CERTIFICATION

- **Introduction to Computer Science - CS50X: Harvard University**
- **AI Tools Workshop: BE10X**
- **RC Car Workshop: ComedKares**
